

2005 Permits issued to Ship Packaged bees & Queens into Indiana

As of April 27, 2005 these are the companies or individuals that have sent in their application and received their permits. To ship or bring bees into Indiana the company or individual must have an Indiana permit (IC-14-24-8-4). This is to insure that Indiana beekeepers that the hives that the bees are coming from are inspected in the original state and are free of diseases, treated for small hive beetle and varroa mites, and certified European honey bees. If you know of any company or individual shipping into Indiana not listed below please contact the State Apiary Inspector, Kathleen Prough at 317-232-4120.

Some of these apiaries are shipping from small hive beetle infested areas. Under Indiana State Code 14-24-11-1, sec.1 (3), a person who conceals the present of a pest or pathogen violates this article. If you contact these companies or individuals to purchase packaged bees or queens they must inform you if the packaged bees are from a SHB infested area. If you have questions about these listed companies, please contact the State Apiary Inspector, Kathleen Prough at 317-232-4120, e-mail: kprough@dnr.in.gov.
